

## **The 12 emanations and seals of A Lord God**

### The Celestial seals

1. The seal of the eternal father (God) -A throne
2. The seal of the eternal Mother (Goddess)- An abode

### The First divine seals

- A. The watcher seal
  3. The self
  2. The other
- B. The seal of Time
  4. the past
  - 5.the future
- C. The Mythological seal
  6. The upperworld
  7. The middle world
  8. The underworld
- D. The Principles seal
  9. Magnetic
  10. Electric
- E. The Presence seal
  11. Elohimic seal (Demiurge)
  12. The Avataric seal

These are the Emanation and seals of A Lord God. That is a Lord God has access and control of all these seals. This is a tool to see what is necessary to get closer to any being that is considered a lord god. It is also a tool to see the criterias of godhood.. Each seal is known as a star, a thing that has magnitude/quantity and a set quality that separates one star from another

## **The two sacred poems of Allah**

There are two sacred ideas in which all beings are gifted. It is a gift of dreams and a gift of progression

1. Bardos: This is a gift from the father
2. Keys : This is a gift from the mother

## **The bardos:Kama loca**

The periods between and possibilities of existence. A Place in which The Eternal Father has blessed for all of eternity. The gift of the Father to the mother for which they form a Union and gifted to all beings. A universal home represented by the tree of life matrix. A promise of Existence

### *The Matrix (Existence as Myth)*

#### A. The Upper World

- a. The Upperworld is a realm of existence in eternality. That is if this world and universe didn't exist, the upper world would still exist. The Upper World is the world in which governs the middle world. This world of heavenly order is and will always be. It is limitless in scope and vast in comprehension. The throne of the Eternal Father of this present Universe is in the Upper World

#### B. The Middle World

- a. The middle world is the present world in existence, the present universe and everything that forms and governs it. The middle is the world that is common to all. This is also the location of the Kamaloka and many bardos

#### C. The Underworld

- a. The Underworld is practically empty space prior to our existence. It is the womb in which this present existence came from. It is the nothingness in which everything can stem from. It is in the Underworld you will find all stories, ideas, and paths leading to this world. This chaotic realm is as vast in scope as the upper world. It is through this world anything is possible. The throne of the Eternal Mother of this present Universe can be found in the Underworld of this Universe

### *A bardo : The KamaLoka*

A bardo is an intermediate state between Life and Death, or a general term (Existence). We either exist or don't exist. That is a bardo is a state of a particular existence. Dreams are bardos, living is a bardo, and whatever happens at death is a bardo. Stories of such a state are bardos. The place that stores all bardos and dreams is known as the Astral plane, the higher form of the middle world, the kamaloka.

## The four universal keys

These are the keys that are hidden in the soul of the universe for all beings to find. Its keys of progression and actualization. It is a gift from the eternal mother to all beings to be great in the eyes of the father. By obtaining these three keys, a being becomes a genuine child of both the eternal father and mother

### 1. Key 0: The key of the first divine

- This key is a unique key to each individual being and is the start of their relationship with the The two Celestial beings.

### 2. Key 1: The key of magical/spiritual progression

- This key is universal to all beings and it is the start of developing the ideas and natures for spiritual progression. It is a foundational key

### 2. Key 2: The Bardo key/key of spheres

- This key introduces a being to the expansive nature of their being and the universe around them. Through this key an individual becomes a cosmic citizen. This key is also foundational

### 3. Key 3: The key of lordship (Godhood)

- This key allows an individual to act as Source, and be of a celestial nature
- It is a graduation key

\* Mastery of these Keys are necessary to become a genuine child of God. As many are unaware of the existence of these keys , most remain in a standstill state in which in the cycle of reincarnation their soul seeks to gain closer to a point in which the study of these keys are placed in front of them. Key 0 is the most fundamental key, and many individuals develop an aspect of this key, however its true meaning is acknowledgment of divinity of existence. The uniqueness of the Human form is that Key 1

## Classification of Beingness

1. Angelic (eternality) ; The word
  - a. Angelic nature is the nature of being eternal. That is angels are beings closer to eternality. Angels are all around us. The uniqueness of their existence is that they are of the Father. They mimic his existence. Angels are always part of a Universal system, an extension of source. That is their free will is questionable, even when they become very advanced. Hence why we have angels who have chosen to fall into a finite state. A concrete definition of an angel is the eternal intelligence behind the movement/government of things. The intelligence that has always existed behind every specific thing. There are angels of the sky, the moon, the sun, and etc. Some angels are known to us throughout literature. The nature of an angel is of eternality and an extension from order.
  - b. The locations of Angels are in the upper world and stems into the middle world
2. The image/Manu/Adamanic :The mortality; The finite: The limited
  - a. The image that we are most familiar with is the human form as being superior. However this is just from our own perspective. The image of a fish in the sea, will see themselves as superior. Nonetheless, there are finite forms all over nature , and we can speculate perhaps the whole universe. The image is finite, it has a beginning and it has an end. A common sense approach is to say that the image is all that really existed because it is in fact real in lower sense that is common to all than the other two natures
  - b. The location of images are in the middle world with a foundation in the Underworld, and perfection in the Upperworld
3. The Elemental::The foundational Unlimited:The Elemental: The Divine Goddess
  - a. The elemental is the building blocks of existence. It too is limited in that its domain is the material world which is in the finite universe. However Elemental existence is purer than that of the image it creates. Its pureness comes from the fact that elementals' primary existence is in the underworld and stems into the middle world. The limited nature of elementals come from the fact that they are an extension from chaos. That is Archetypal Fire, Archetypal Water, Archetypal Air, Archetypal Earth can be found in the Underworld in its purest forms. Elementals are similar to angels in that they are part of a system and their free will is questionable unless they are very advanced. A concrete definition of an elemental is the intelligence that is used to make something in existence.

- b. The location of elementals are in the Underworld and stems into the middle world
- 4. The Tree as an example
  - a. The Angels of the Tree
    - i. The Angel behind a specific tree would be the intelligence that has knowledge of everything about that specific tree. This intelligence will know everything about the tree, its relationship with everything. This intelligence will be in charge on whether or not the tree lives or dies. This intelligence is the angel of that tree. It is the eternal nature of the tree
  - b. The Image
    - i. The image of the tree will be the tree itself. It is what we see. A tree that is planted from a seed and forms, then dies
  - c. The Elemental of the tree
    - i. The elemental of the tree would be the intelligence that forms the tree consciously. It is responsible for forming the tree like a painter paints an image.
- 5. Manu as an example
  - a. The angel of Manu
    - i. The human form in eternality has an intelligence behind it. That is every human form has an intelligence that governs its existence . This angel can be thought of a guardian angel of the Spirit soul, or a higher aspect of that specific form that governed it coming into existence
  - b. The image
    - i. The image is any particular human. From a normal perspective, just a person
  - c. The elemental of Manu
    - i. The elemental aspect of Manu or a particular person is the intelligence that made that particular form the way it is like an artist paints a painting. We can argue that every form has access to different elemental vibrations thats why everyone is different

\* These three natures are just us sectioning off existence so that it can be studied. Upon further study we will see that a connection to certain images, angels, elementals are what makes a person what they are, determining their gifts, natures, and cycles of reincarnation. The wise will also find that the eternal father and eternal mother nature is a complete accumulation of these three natures, and as such all beings are learning to flow between these three natures.
