

The Oracle's Gift

Religious foundation is of a nature and domain relating to Key 0 and Key 2. That is, this gift is a frame in which we can see the Father's gift to all who finds his holiness and cosmic order in such a way that all things are possible when he is sought. All possibilities of faith and belief is granted in such a frame using the holy spirit or the Cosmic Goddess whose placement next to him is to place all beings in alignment with his order, be it in comparison or subservience, or in competition. As an oracle, I am but a medium to his eyes and hands.

Here are my precept or premises

1. Magic and Science is objective spirituality and of a nature and domain relating to Key 1. Key 1 is a cosmic key of growth in knowledge and wisdom
2. Genuine Science of the holiness of God, the use of his word, and speaking for the Father, is the nature and domain of Key 3... such a science can only be taught by Allah through revelation and Angels/genies of a god-like nature whose very being is holy and godly... Such a science is the spiritual ABC's of Godhood. Wisdom of Key 3 is the natural revelation from practice and seeking of Key 0, 1, 2... such a Key shows that anything is possible under the Father's Universe.
3. Key 2 in essence is the study of spherical realms of possibility. That is through study of Key 2 we see that gates and doors of possibilities are opened up in such a way that the Phrase "In my Father's house are many mansions: if it were not so, I would have told you". That is through this Key, one studies the spheres of possibilities of existence.
4. It is in this gift I say that the spirit of Franz Bardon has cleared the path for me to lay the groundwork of what is needed to be shared on this earth. That is, doors of limitless possibilities are the future.

The vibrations of these keys are as follow

1. Key 0- The Child
 - a. Every being when facing their existence will see their true nature that is unique. As such every individual soul will have a different way of vibrating in this universe. That is there key 0. However every

individual will have to acknowledge some fundamental truths about the universe through individual lenses

2. Key 1,2- The holy spirit/Goddess

- a. It is through these fundamental truths that an individual acquire a key of growth and possibilities that place them into the the path of becoming an even closer and stronger child of God. Such a universe is limitless. An individual is a Child of the mother bestowed with powers from their knowledge and Wisdom. Such powers may not have a holy basis but gained from shear knowledge of cosmic laws

3. Key 3- The Father

- a. When an individual acquires the beingness of the eternal substance they are given the powers, gifts, and responsibilities that come from such a holy state, in such a way, like a child of the Father they are a genuine extension of his will. Such a power is the word incarnate. Nothing is impossible for such an incarnated being, or discarnated spiritual force who vibrates in the realm of Sat or Keter.

It is this basis in which we will study the following texts. To develop a domain of possibility to this sphere we are in. The following texts are

1. The Bible
2. The Quran
3. The Bhagavad Gita

As these are the most prevalent Religious domains in this sphere... we will branch from there. We will view these texts as Key 2 texts.... and look how it shapes an individual's Key 0. I am using my solar consciousness to observe these texts for what they are. Religion and belief is not something to take lightly as a Child

Key 2 is the matter of important topics

1. Angelics and Demonics: This is the study of the heavens and the abyss
2. With Lord circle as a description of Universal being and the 10 sephiroths as a description of foundational universal being... We have an epistemological framework sufficient enough to study this sphere of existence under a Key 2 domain in which the Real is subject to a tantric perspective in which seemingly unreal things become real and seemingly

real things can become unreal with the right lens. Hence why Key 2 is a hard key to study and requires some knowledge of Key 1

3. These topics are of knowledge in which four types of beings will have
 - a. Angels
 - b. Demons
 - c. Gods
 - d. Advance Manu forms
- Angels and Demons are of the same nature... while Angels are holy and the closer they get to tetragrammaton the more free will are in their beings... they are holy in the sense that they are privy to knowledge of the Father and work as an extension of holiness otherwise their being would descend to the middle world. Demons can be holy but the nature of their existence does not depend on the Father's work, in fact what makes a being a demon is it's relationship to the abyss or the far reaches of the Underworld where the domain of the Father has no sway. If we think of the Father's extension into this reality as being a matrix... demons by correct definition exist outside of that matrix...
- Gods by definition are beings closer to a demiurge like nature (on which there is a scale of influence)... Angels and Demons can fall under that category. For example an angel can be an angel by designation of eternity, but lack the beingness to be a god... similarly a demon can be a demon by designation of existing out of the matrix but lack the influence to be considered a God.
- Advanced Manu forms are simply beings who are of physicality but by assessment on understanding the fundamental keys of existence, are very advanced that they can be considered God like
- Many if the Gods of Africa, India, and on various parts of this sphere can be considered Demons because there sphere of influence can be outside the Father's domain... in such a way that when these beings introduce a competitive matrix with that of the Father. These beings by very conception are sons of God/Children of God. Such beings have Key 0, 1, 2, 3 as a foundational base. And perhaps even more keys than these
- It is my findings and intuitions that the Abrahamic Heirachy of the old and New Testament is the correct influence for this sphere of existence on Earth. That is, the story of Earth begins from Genesis. With a grasp of Key 2 and 3, an individual will understand how this Key can manipulate reality

in a way that mortals cannot understand as they are within the existence that is being manipulated.

- However there are other influences on this earth as such our Epistemological knowledge will explore those influences as well. Voodoo and Tantra are some such influences as these practice alter the sphere of the middle world in such a way that the Underworld becomes a type of Upperworld. This practice was prevalent in many early forms of society without a religious base.
- On Death: Death is under the domain of knowledge of Key 2. A Bardo is a state that encompasses all possibilities. The natural approach is to assume reincarnation. Or the change of one state into another state based on vibrations. But Key 2 knowledge changes the process of reincarnation drastically. Every soul is unique. There may be an ascent, a descent, a transformation, resurrection, and many other possible bardo state that a soul may find themselves in based on Key 2 vibrations. As such religion as an umbrella guides this process exponentially through manipulation of Key 2. Otherwise an individual soul is subject to whatever the Demiurge sees fit. Faith and belief is important, in such a way that an individual's dream life is molded by their religion and belief providing a quantum certainty and comfort in their mind. And I say quantum in the sense that two separate beliefs can often be contradictory but still true when Key 2 is used
- Now there is the question of how anything can be known.. Dreaming is a fundamental part of the Philosophy of the Way. My knowledge comes from the Sun. As such my musings will describe anything possible under the sun of this earth.
